DEDHAM MEDICAL ASSOCIATES

It's not by accident that members of Dedham Medical's Pediatrics Department have repeatedly won recognition for the quality of the care they give their young patients in Boston's western suburbs.

With more than a dozen physicians and pediatric nurse practitioners, they're readily accessible. Their training and backgrounds are impressive. They bring out the best of the group-practice format, with a reliance on consulting and challenging each other about cases, diagnoses and treatment options. They have access within their practice to specialty resources in allergy, dermatology, endocrinology, ENT, orthopedics and pediatric dentistry – as well as DMA's obstetrical service.

And they also have one of the highest rates of well-child visits among practices in Massachusetts, reflecting strong attention to the preventive care that helps parents raise healthy, happy children. It's a level of commitment found across the board, whether in a doctor's visit for earache or fever, or in a nurse practitioner's helping a new mother learn the fine points of breast feeding.

If you would like your children to have access to personal, compassionate, top-quality pediatric care, call Dedham Medical Associates at 781-329-1400 to set up an appointment.

Dedham Medical Associates provides care in more than 20 medical specialties, including Internal Medicine, Pediatrics, Allergy, Adult Dentistry, Pediatric Dentistry, Endodontics, Orthodontics, Periodontics, Audiology, Cardiology, Dermatology, Ear, Nose & Throat, Endocrinology, Gastroenterology, Gynecology, Laboratory, Nutritional Services, Obstetrics, Ophthalmology, Orthopedics/Physiatry, Podiatry, Physical Therapy, Radiology, Rheumatology, Surgery, Urology and Vein & Aesthetic Center. For information about becoming a patient, call 781-329-1400, or see our web page at www.dedhammedical.com.
